## About the ZoomAlbum™ Creator 2.1

Creating a ZoomAlbum™ is quick, easy, and inexpensive! This software is your tool for making a personal memory book in pocketbook size – to give as a gift, to carry in your pocket, or to leave on the coffee table. Welcome to the better way to preserve your memories and share your photos!

A ZoomAlbum is a unique 12 page, pocket-sized photo album. ZoomAlbums are printed on high quality photo paper and bound in an attractive hardcover. With this Creator software, you can even print your own photo covers for your albums.

After installing your Creator software, just follow these easy steps to make a ZoomAlbum:

1. **Select photo:** select the photos you want for your ZoomAlbum pages and cover.
2. **Layout:** select a layout for your ZoomAlbum pages.
3. **Prepare:** prepare the ZoomAlbum by dragging, positioning and resizing the photos in the ZoomAlbum template for the album pages and album cover.
4. **Add text:** add text captions to any one of the album pages or to the cover.
5. **Print:** print the album pages and cover on the special ZoomAlbum printable paper.
6. **Fold:** follow the folding instruction for the album pages. There are separate assembly instructions for the pages, and for the album cover, in the help sections. Go to the “Help menu” in the “Manager” window and select the “Fold paper video” and “Assemble cover video” options to watch the actual process.

## Installing the application from the Internet

### If you downloaded the application from the Internet

Double click on the Install.exe icon that will appear on your desktop and follow the prompts to install the software.

### Starting the application

Launch the application by double clicking on the program icon on your desktop; or, click the “Start” button and choose Programs, then select and click the icon from the Programs pop-up menu.

## Installing the software from a CD ROM

Insert the CD ROM in the CD drive and install the application. After the installation, a program icon will appear on your desktop.

## Starting the application

Launch the application by double-clicking on the program icon on your desktop; alternatively, click the "Start" button and choose "Programs" then select and click the icon from the Programs pop-up menu.

## Product Registration

The first time you run the software, you will see a registration screen. In order to complete the installation process, please register by making sure you are connected to the Internet and then selecting "Register online." If you lose your connection to the Internet before registration is complete, go to the "Help menu" button on the "Project manager" window and select the "Register" option.

Registering your product will ensure that you are notified of any upgrades to the software.

## System Requirements

CPU 1 GHz (x32) or higher with MS Windows® Vista or Windows® XP.

512 MB RAM (1 GB recommended).

1 GB free disk space.

Recommended screen resolution - 800 x 600 pixels with 32 bit color quality or greater.

Microsoft Internet Explorer 5.0.1 SP3 and above recommended.

Adobe® Acrobat Reader® 5.0 and above recommended to display the Users Guide.

## PROJECT MANAGER

The “Project manager” window is where you create new ZoomAlbum projects and export, import, save, delete or view your existing ZoomAlbum projects. Each ZoomAlbum you create is saved as a ZoomAlbum project with 12 inside pages and a cover page.

### The “Project manager” window

#### 1. The main tabs

Manager, Select, Layout, Prepare, Add text, Print

#### 2. The Create new/ Import ZBM files project tabs

Create a new ZoomAlbum project; or Import an existing ZoomAlbum project and edit it.

#### 3. The ZoomAlbum projects list

Lists existing ZoomAlbum projects.

#### 4. The ZoomAlbum project preview window

Preview all 12 pages of the selected ZoomAlbum project.

#### 5. The ZoomAlbum project buttons

Export, Import, Save As or Delete an existing ZoomAlbum project.

#### 6. Tour (Show me how)/ Help (?)

Get help and learn more about the ZoomAlbum software.

- Manager- about the Manager window
- Help guide- HTML help
- Fold paper video- view a movie about folding the album pages
- Assemble cover video- view a movie about assembling the album cover
- Reference manual- get information from a PDF help manual

- Register- register your software online
- Check for updates- check for upgrades to the software
- About ZoomAlbum™ creator
- Technical support- how to find additional help and information
- License agreement

## Create a new "ZoomAlbum" project

1. Press the "Create new" button on the "Project manager" window.
2. Enter a new name for this album in the "Create new project" window.
3. Clicking "OK" will automatically take you to the "Select photo" window.
4. After selecting the photos to create your ZoomAlbum project, click the "Save" button.

## View, export and import existing projects

**Preview your projects**- click on a project in the "Projects" list and a preview of your ZoomAlbum will appear in the "Preview" window. The 12 album pages will be displayed.

**Export** - export a ZoomAlbum project as a .psi file. This file includes all the photographs, text and frames from the project, and may be opened in a different location or even on a different platform.

1. Click the "Export" button to open the "Export project" window.
2. Select "Normal" or "Professional" resolution from the "Quality" drop down menu:
  - a. "Normal resolution" – the photos will be compressed to a resolution high enough to print on A4 or legal size paper.
  - b. "Professional resolution" – the photos are saved at their original resolution.
3. Click the "Browse" button to browse your computer and select the destination folder to save your project.
4. Enter a file name in the "File name" box.
5. Click the "Save" button.
6. Click the "OK" button and the project (.psi file) will be saved in the destination folder that you chose.
7. You can send the projects (.psi files) to another computer with ZoomAlbum Creator 2.1 installed to be imported, viewed, edited and printed.

**Import** - import a ZoomAlbum project (.psi file) created by ZoomAlbum 2.1 or later.

1. Click on the "Import" button to open the "Choose file to import" window.
2. Select any .psi file from your computer (e.g. vacation.psi).
3. Click the "Open" button to open the "Import project" window.
4. If you wish to change your selected file, click the "Change" button and select a different file.
5. The original project name appears in the "Project name" box. To change the name, type in a different one.
6. Click the "Browse" button to browse your computer and select the destination folder to save your project.

7. Click the "OK" button. Your project will automatically appear in the "Projects list" window.

**Save as** - save a copy of an existing project under another name.

**Delete**- to delete a project, select it from the "Projects" list and click the "Delete" button.

**Import ZBM files**- if you previously created and saved a ZoomAlbum project using

**ZoomAlbum™ Creator 1**, it will appear as a "ZBM" file on your computer.

1. To import the project, click the "Import ZBM files" button.
2. Select the ZBM file from your computer (e.g. family.zbm).
3. Your project will appear in the projects list window.

## CREATE AND PRINT ALBUM PAGES

### 1) SELECT PHOTO

Follow these steps to choose 12 photos that will become the inside pages of your ZoomAlbum.

### The "Select" window

#### 1. The album pages

Choosing this button allows you to view, choose and edit photos for the Album's 12 pages.

#### 2. The directory tree window

The directory tree presents the folders on your computer. Folders containing pictures will open as resizable photo thumbnails.

#### 3. The thumbnails view window

View all pictures in a folder as resizable photo thumbnails in this window.

#### 4. **The thumbnail resize scroll bar**

Resize the thumbnails to view more photos or to view larger thumbnails.

#### 5. **The selected photos pane**

View the 12 pictures selected for the ZoomAlbum.

#### 6. **The add and remove photos buttons**

Add new photos or remove photos from the selected photos pane.

### **Selecting your photos**

1. To select a photo manually:
  - a. Use the "Directory tree" window on the left to browse your computer and select any drive, then choose your desired photo folder.
  - b. Choose a digital photo and position it in any of the 12 ZoomAlbum pages by using one of the following options:
    - i. Drag a photo from the "Thumbnails view" window to any of the 12 squares in the "Selected photos" pane, or...
    - ii. Choose a photo from the "Thumbnails view" window and press the "Add photo" button. (This button is represented by an "open book" icon in the lower right of the screen). The photo will be placed in the first empty square in the "Selected photos" pane.
  - c. To change photos, just drag the desired thumbnail onto the photo you want to replace.
  - d. Continue by selecting the "Layout" mode or the "Next" button (>). To "Exit" now and continue editing the project later, first press "Save" and then select "Close project."
2. Use the "Add folder" option to select a folder and display all of the photos in it:
  - a. Click on the "Add folder" button.
  - b. Browse your computer and select any drive and then directory. To open any folder that contains photos, just click the "OK" button.
  - c. The photos in the folder will appear as photo thumbnails in the "Thumbnails view" window.
  - d. The first 12 photos in the folder will be placed in order in the "Selected photos" pane.
3. Use the "Add image" option to select one image:
  - a. Click on the "Add image" button.
  - b. Browse your computer and select any directory, then select a file and click the "Open" button.
  - c. The photo will be placed in the "Selected photos" pane.
4. Slide the slider handle to the right (+) to increase the size of the photo thumbnail or to the left (-) to decrease the size of the thumbnail, until you reach the desired size.
5. To Save - click on the "Save" button to save your work.
6. Close Project- click the "Close project" button to go back to the "Project manager" window.

**Note:** This version of the Creator software supports the following digital photo formats:

CompuServe GIF (.gif)

JPEG (.jpg / .jpeg)

Macintosh PICT (.pct / .pict)

Photoshop (.psd)

Portable Network Graphics (.png)

Tagged Image File Format (.tif / .tiff)

Windows or OS/2 Bitmap (.bmp)

Zsoft paintbrush (.pcx)

## 2) LAYOUT

Follow these steps to select a layout for the album pages and to add a frame to your photos.

1. Choose the Page layout for your ZoomAlbum pages:  
(Reading counter-clockwise from above left illustration)
  - a. Photo is centered with equal size borders all around.
  - b. Photo is aligned top.
  - c. Photo is aligned bottom.
  - d. Photo is aligned center.
2. To add a decorative picture frame to the photos:
  - a. Check the "Add a picture frame" check box.

- b. Choose a picture frame style by clicking on it. A blue border will then be displayed around the chosen frame.

### 3) PREPARE

After selecting your desired photos, you are ready to prepare and position the 12 photos in the ZoomAlbum template.

#### The “Prepare” window

1. **The album pages**  
Choose “Album pages” to view and edit the Album’s 12 pages.
2. **The selected photos pane**  
View the pictures selected for this specific ZoomAlbum project.
3. **The prepare photo window**  
View each selected photo in this window to prepare it for the ZoomAlbum.
4. **The photo resize scroll bar**  
Resize the thumbnails to view more photos or to view larger thumbnails.
5. **The rotate and flip buttons**  
Rotate your picture 90 degrees or flip any picture vertically or horizontally.

#### Prepare album pages

1. Make sure the “Album pages” tab is pressed.

2. Choose the photo you want to prepare by clicking on it in the "Selected photos" pane on the left.
3. Position your photo by dragging the photo and repositioning it within the ZoomAlbum template (the Prepare photo window).
4. Enlarge or decrease photo size- Slide the slider handle to the right or click the "Zoom in" button to increase the size of the photo; or slide the slider handle to the left or click the "Zoom out" button to decrease the size of the photo.
5. Rotate- click the "Rotate right" or "Rotate left" buttons to rotate your picture 90° to the right or to the left.
6. Flip- click the "Flip" buttons to flip the image horizontally or vertically.
7. Save- click on the "Save" button to save your project.
8. Close project- click the "Close project" button to go back to the "Project manager".

## 4) ADD TEXT

### The "Add text" window

1. **The album pages**  
Choose to edit the Album's 12 pages.
2. **The selected photos pane**  
View the pictures selected for the ZoomAlbum project.
3. **The prepare photo window**  
View each photo and prepare it for the ZoomAlbum.

#### 4. **The format text pane**

Format text and add it to the ZoomAlbum page currently displayed in the Prepare photo window.

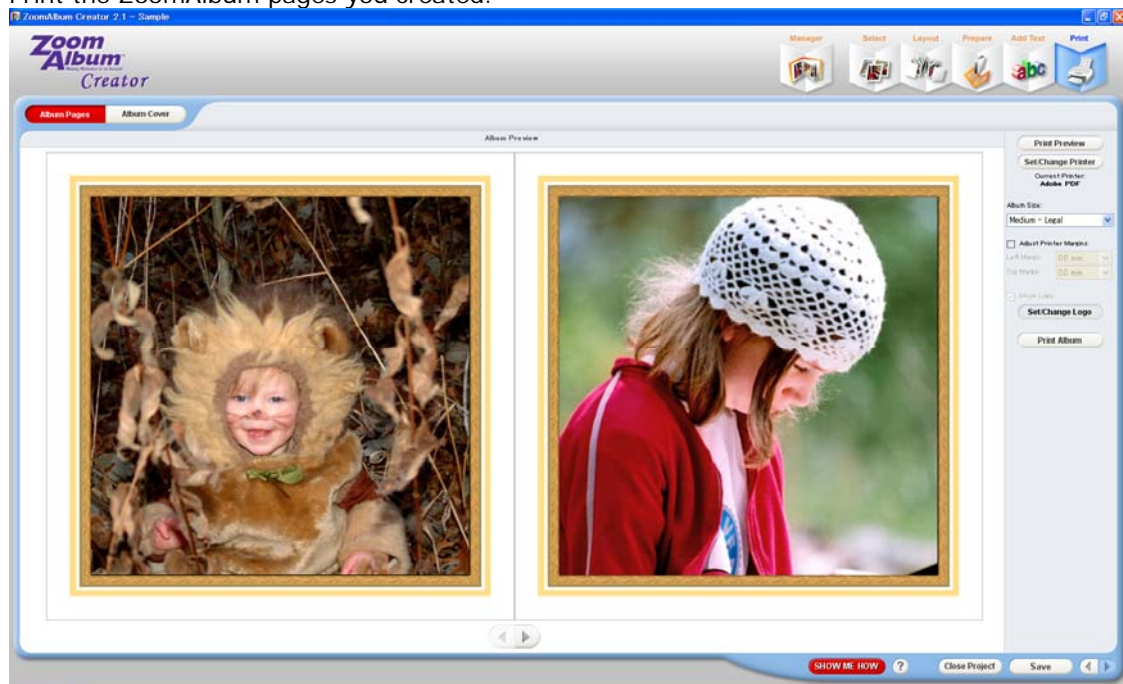

### **Add text to the album pages**

Text added to the photo can be positioned inside or outside of the photo.

1. Click the "Add" button. You can add as many text boxes as you wish (see point 6).
2. Type text in the "Add text" window. The text you typed will automatically appear on the picture in a text box.
3. Once the text is displayed in the picture, you have the ability to position it anywhere on the page (including on the photo itself). Simply click anywhere on the text box and drag the text box to the desired location.
4. To change the text wrapping or to resize the text box: Position the mouse pointer over one of the sizing handles. Drag and change the sizing until the text box is the shape and size you want.
5. Format your text using these formatting text options:
  - Font**- select a font from the "Font" drop down menu.
  - Font size**- choose any font size from the "Size" drop down menu or type in a size.
  - Font style**- select the "Bold", "Italic" or "Underline" buttons to change the font to bold, to italic, or to add an underline.
  - Text alignment**- align the caption left, right or center in the text box.
  - Transparency**- move the slider to the right to increase text box background transparency or to the left to decrease text background transparency. To see text only on a photo, without a background, slide the transparency slide to the right to eliminate the background color.
  - Text color**- to change the color of the text, select the "Text color" button, choose a color in the color box, then click OK.
  - Background color**- select the "Background color" button to change the background color of the text box, choose a color in the color box and click OK. (To see text only on a photo, without a background, slide the transparency slide to the right to eliminate the background color.)
6. Adding additional text: to add additional text, repeat the steps from process (1) above.

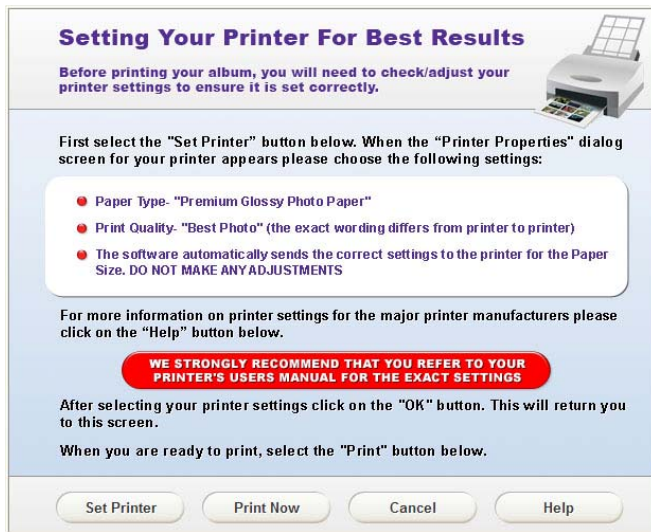

## 5) PRINT

Print the ZoomAlbum pages you created.

1. To preview the ZoomAlbum before printing it, click the "Print preview" button on the ZoomAlbum print page.
2. Select one of the four album size options from the "Album size" dropdown menu:
  - a. Small - A5 (to make a 2" x 2" album)
  - b. Medium - A4 (to make a 70mm x 70mm album)
  - c. Medium – Legal (to make a 3" x 3" album)
  - d. Large - A3 (to make a 4" x 4" album)
3. Click the "Print album" button.

4. The "Setting your printer for best results" window will open.

5. In order to get the best possible quality ZoomAlbum, it is important to set your printer to the correct settings for the ZoomAlbum paper. There are **two** settings that need to be adjusted: Paper type and Print quality.  
Different printer manufacturers have their own setting options and descriptions for paper type and print quality. These differ per model. Before printing your album, you will need to check/adjust the settings **on your printer** to ensure that it is set correctly.
6. First select the "Set printer" button on the window.
7. When the "Printer properties" dialog screen for your printer appears, please choose the following setting.
  - a. Paper type- "Premium glossy photo paper"
  - b. Print quality- "Best photo" (the exact wording differs from printer to printer)
8. After selecting your printer settings click on the "OK" button. This will return you to the "Setting your printer for best results" window.
9. Select the album size you wish to print from the "Album size" dropdown menu.
10. Load the ZoomAlbum printable paper in the paper feed tray. Use the practice sheet provided to check the picture positioning. For additional practice, use plain paper. Be sure to feed the paper in the direction of the arrow on the back. For best results, only feed one sheet of ZoomAlbum paper at a time.
11. To print, select the "Print now" button in the "Setting your printer for best results" window.
12. If you need to change your default printer, click the "Set/ change printer" button on the ZoomAlbum print page.
13. Adjust Printer margins: after printing your album you may find that your photos are not properly centered on the ZoomAlbum printable paper. The "Adjust printer margins" allow you to manually reposition and reprint the ZoomAlbum printable paper correctly:
  - a. Select the "Print preview" button to view the album.

- b. Take your ZoomAlbum printout (with the distortion) and hold it in exactly the same orientation as in the "Print preview" window, ensuring that the picture that appears in the top left corner is the same on both.
- c. Use the top left picture on the printable paper printout to decide how to center it within its box. All the other pages will be corrected automatically (Note: the changes will NOT be seen on the "Print preview" window).
- d. Click the "Adjust printer margins" check box.
- e. Select one of the following options to correct the position of the picture within the box:
  - i. To move the photo to the left- select one of the negative settings (e.g. - 1.00 mm) in the "Left margin" dropdown menu.
  - ii. To move the photo to the right- select one of the positive settings (e.g. 2.00 mm) in the "Left margin" dropdown menu.
  - iii. To move the photo up- choose one of the negative settings from the "Top margin" dropdown menu (e.g. -1.50 mm).
  - iv. To move the photo down- choose one of the positive settings from the "Top margin" dropdown menu (e.g. 1.50 mm).

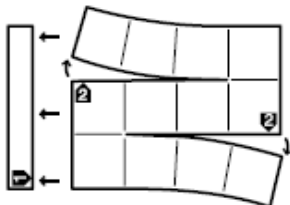

14. Click "Print album" and follow steps 6-8.

**Note:** The "Album size" and "Adjust printer margins" settings that you have chosen will NOT be saved on closing the ZoomAlbum program.

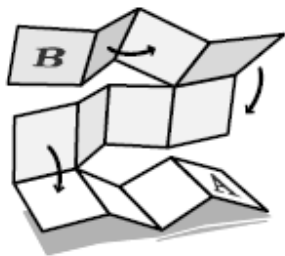

## 6) FOLD

ZoomAlbum paper is fast drying paper; however the drying time may vary due to ink blend, amount of ink used, temperature and humidity. Make sure the ink has completely dried before folding the ZoomAlbum.

1. After printing the next step is to fold and assemble your ZoomAlbum. Separate the end tab first (1). Separate panels along the lines indicated by (2). Do not force the separation. The paper should separate easily.

2. Fold the panels as illustrated. The pictures should face each other.

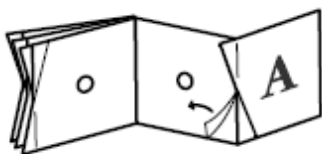

3. Fold panels as illustrated into the shape of a booklet.

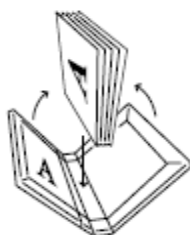

4. Press the album firmly. Be sure all pictures are facing each other.

5. Re-open the panels and peel off the backings. Do not peel off the end panel backings marked 'A' and 'B'.

Peel off the backings 'A' and 'B'. Drop the album into the cover provided. Be sure to center it carefully. Press your cover and the pages firmly together for a permanent bond, and enjoy your new ZoomAlbum!

# PREPARE AND PRINT A ZoomAlbum COVER

## 1) SELECT PHOTO

Select the photo for your album cover.

### The "Select" window

#### 1. The album cover tab

Choose to edit the cover page of the current ZoomAlbum.

#### 2. The directory tree window

The directory tree presents the folders on your computer. Folders containing pictures will open as resizable photo thumbnails.

#### 3. The thumbnails view window

View all pictures in a folder as resizable photo thumbnails in this window.

#### 4. The thumbnail resize scroll bar

Resize the thumbnails to view more photos or to view larger thumbnails.

#### 5. The selected photos pane

View the picture selected for the ZoomAlbum cover.

#### 6. The add and remove photo button

Add a new photo or remove the photo from the Selected photo pane.

## Select Photos

1. To select a photo manually:
  - a. Use the "Directory tree" window on the left to browse your computer and select any drive, directory or file.
  - b. Choose a digital photo and position it in the ZoomAlbum cover square by using one of the following options:
    - i. Drag a photo from the "Thumbnails view" window to the square at the bottom in the "Selected photos" pane.
    - ii. Choose a photo from the "Thumbnails view" window and press the "Add photo" button.
  - c. To change the photo, just drag the desired thumbnail onto the photo you want to replace.
  - d. To continue, select the "Prepare" mode or the "Next" button (>). To "Exit" now and continue editing the project later, first press "Save" and then select "Close project".
2. Use the "Add folder" option to select a folder and display all of the photos in it:
  - a. Click on the "Add folder" button.
  - b. Browse your computer and select any drive and then directory to open any folder that contains photos and click the "OK" button.
  - c. The first photo in the folder will be placed in the "Selected photos" pane.
3. Use the "Add image" option to select one image:
  - a. Click on the "Add image" button.
  - b. Browse your computer and select any directory and then file and click the "Open" button.
  - c. The photo will be placed in the "Selected photos" pane.
4. Slide the slider handle to the right (+) to increase the size of the photo thumbnail or to the left (-) to decrease the size of the thumbnail, until you reach the size needed.
5. Save- click on the "Save" button to save your work.
6. Close project- click the "Close project" button to go back to the "Project manager" window.

## 2) PREPARE

After selecting the photo, you can now prepare and position it in the ZoomAlbum cover template.

### The "Prepare" window

1. **The album cover tab**  
Choose to edit the photo for the cover page.
2. **The selected photos pane**  
View the pictures selected for the ZoomAlbum project.
3. **The prepare photo window**  
View your photo and prepare it for the ZoomAlbum cover.
4. **The photo resize scroll bar**  
Resize the thumbnails to view more photos or to view larger thumbnails.
5. **The rotate and flip buttons**  
Rotate your picture 90 degrees or flip them from side to side or upside-down.

### Prepare the album cover

1. Make sure the "Album cover" tab is pressed.
2. Position your photo. Position the photo by dragging and repositioning it within the ZoomAlbum cover template (the Prepare photo window).

3. Enlarge or decrease photo size: to increase the size of the photo, slide the slider handle to the right or click the "Zoom in" button. To decrease the size of the photo, slide the slider handle to the left or click the "Zoom out" button.
4. Rotate- click the "Rotate right" or "Rotate left" buttons to rotate your picture 90° to the right or to the left.
5. Flip- click the "Flip" buttons to flip the image horizontally or vertically.
6. Save- click on the "Save" button to save your project.
7. Close project- click the "Close project" button to go back to the "Project manager" window.

### 3) ADD TEXT

Add text to the ZoomAlbum cover.

#### The "Add text" window

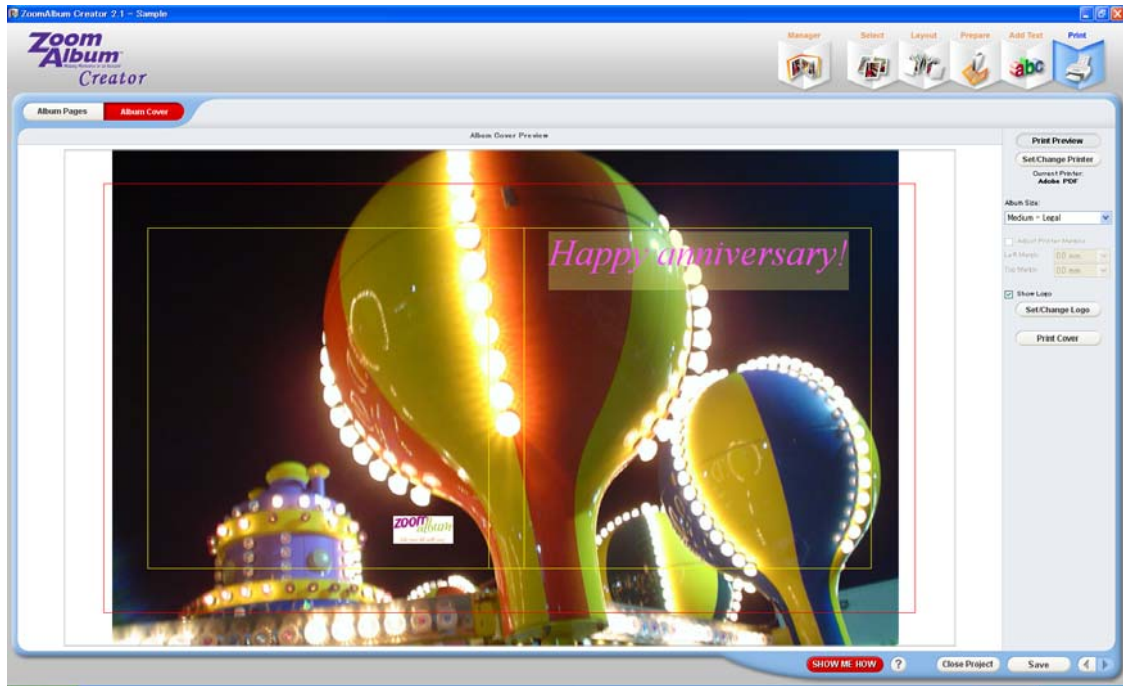

1. **The album cover tab**  
Choose to add text to the Album's cover page.
2. **The prepare photo window**  
View your photo and prepare it for the ZoomAlbum.
3. **The format text pane**  
Format text and add it to the ZoomAlbum cover in the "Prepare photo" window.

## Adding text to the album cover

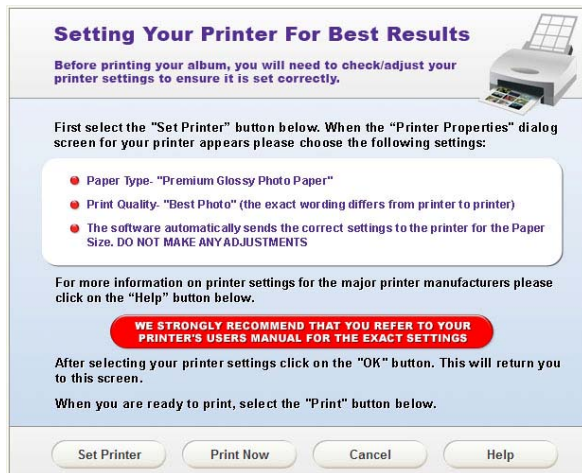

1. Choose one of the text templates from the dropdown box:
  - a. **Album title**- text appears at the top of the front cover.
  - b. **Album comment**- text appears at the bottom right of the front cover.
  - c. **Book title**- text appears on the spine of the folded album book.
2. Type your text in the "Add text" window.
3. Format your text using the formatting text option:
  - Font**- select a font from the "Font" dropdown menu.
  - Font style**- select the "Bold", "Italic" or "Underline" buttons to change the font to bold, italic or to add an underline.
  - Text alignment**- align the text left, right or center on the actual photo by selecting one of these options.
  - Transparency**- move the slider to the right to increase text background transparency or to the left to decrease text background transparency. To see text only on a photo, without a background, slide the transparency slide to the right to eliminate the background color.
  - Text color**- select the "Text color" button to change the color of the text, choose a color in the color box, and then click OK.
  - Background color**- Select the "Background color" button to change the background color of the text, choose a color in the color box, and then click OK.

## 4) PRINT

Print the ZoomAlbum cover.

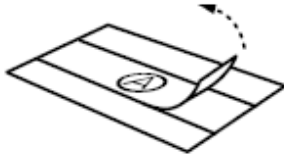

1. Before printing your project, you need to select the album size option from the "Album size" dropdown menu.
  - a. The album size is chosen according to the size of the album you wish to create.
  - b. There are four paper size options:
    - i. Small - A5 (to make a 2" x 2" album)
    - ii. Medium - A4 (to make a 70mm x 70mm album)
    - iii. Medium – Legal (to make a 3" x 3" album)
    - iv. Large - A3 (to make a 4" x 4" album)
2. Click the "Print cover" button.
3. The "Setting your printer for best results" window will open.

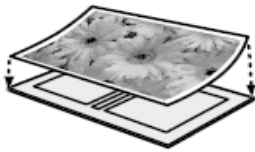

4. In order to get the best possible quality ZoomAlbum, it is important to set your printer to the correct settings for the ZoomAlbum cover paper. There are **two** settings that need to be adjusted: Paper type and Print quality.  
Different printer manufacturers have their own setting options and descriptions for paper type and print quality. These differ per model. Before printing your album, you will need to check/adjust the settings **on your printer** to ensure that it is set correctly.
5. First select the "Set printer" button on the window.
6. When the "Printer properties" dialog screen for your printer appears please choose the following setting.
  - a. Paper type- "Premium glossy photo paper"
  - b. Print quality- "Best photo" (the exact wording differs from printer to printer)
7. After selecting your printer settings click on the "OK" button. This will return you back to the "Setting your printer for best results" window.
8. Load a single ZoomAlbum photo cover sheet in the paper feed tray. Print only one cover photo at a time.
9. Select the "Print now" button to print your selected cover image on one of the cover photo-sheets provided. Be sure to feed the photo-sheet into the printer vertically.
10. Click the "Set/ change printer" button if you need to change the default printer.
11. The "Adjust printer margins" feature is inactive in the "Album cover" mode.

## 5) FOLD

1. Remove the center strip marked A.

2. Place the photo-sheet over the cover chipboard. Be sure to line up the edges of the photo-sheet with the cover chipboard.

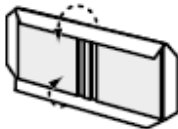

3. Flip over the cover chip board. Pressing two panels and the spine firmly with your fingers, remove the cover chipboard frames.

4. Peel off one side of the cover chipboard to expose the glued surface and fold over onto the photo-sheet. Be sure to remove each of the four corner pieces from the photo-sheet.

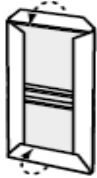

5. Fold the photo-sheet along the longer edges of the chipboard. Press firmly.

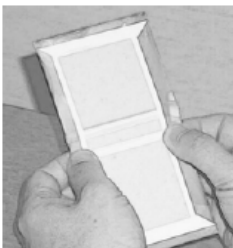

6. Crease the angled corners at the end of the longer edges by pressing firmly for a sharp crease. Do this before folding the shorter edges.

7. Fold-over the end flaps of the photo-sheet along the shorter edges of the chipboard. Press firmly.

8. After all four sides are folded and tightly sealed; pinch the photo sheet together in four places on the left and right at a point just above and below the center strip. Two lower points are shown, be sure to also press at the corresponding points above the center strip.

9. Close the photo-sheet album cover. The cover is now ready for inserting your photo pages.

## Setting Your Printer

In order to get the best possible quality ZoomAlbum, it is important to set your printer to the correct settings for the ZoomAlbum paper. There are **two** settings that need to be adjusted: Paper type and Print quality.

NOTE: The paper size will already be set to LEGAL by the software. The software automatically sends the correct settings to the printer for the Paper Size. ***Do Not Make Any Further Adjustments!***

Different printer manufacturers have their own setting options and descriptions for paper type and print quality. These differ by model. Before printing your album, you will need to check/adjust the settings ***on your printer*** to ensure that it is set correctly.

Printer	Paper Type	Paper Size	Print Quality
CANON	Glossy Photo Paper	Legal	High
EPSON	Premium Glossy Photo Paper	Legal	Best Photo
HP	Premium Glossy Photo Paper	Legal	Best
LEXMARK	Photo Glossy	Legal	
Other	Photo Paper	Legal	High or Photo

**Note:** If you are not yet familiar with how to set your printer we strongly recommend that you refer to your printer's manual before you proceed to print a ZoomAlbum.

1. Select the "Set printer" button on the "Setting your printer for best results" window.
2. When the "Printer properties" dialog screen for your printer appears, please choose the following setting.
  - a. Paper type- "Premium glossy photo paper"
  - b. Print quality- "Best photo" (the exact wording differs from printer to printer)
3. After selecting your printer settings click on the "OK" button.

## Technical Support

Please check our website at [www.ZoomAlbum.com](http://www.ZoomAlbum.com) for additional support and technical information. Direct any support questions to: [support@ZoomAlbum.com](mailto:support@ZoomAlbum.com). We will strive to respond to your inquiry within 2 business days. When emailing us, please include as much information as possible about the problem along with all log/txt files located in the temporary ZoomAlbum folders.
